Our unwavering commitment to innovation has propelled us to the forefront of the tech-landscape. Specializing in Software development, FFT is the trusted partner for transforming your business.

# Why Choose **Quick ERP** for Transforming Your Business

Easy and Complete Customization to replicate your Business processes on Cloud

## ERP

Enterprise Resource Planning (ERP) is a software system that integrates core business processes, such as finance, human resources, and supply chain and providing real-time data and facilitating efficient organizational management.

While an ERP helps in improving efficiency of business activities, we strongly believe in the philosophy 'Different Strokes for Different Folks'. Every Organization despite being in one industry has varied ways of functioning than any other.

***"We believe that our base modules serve as the crust of the Pizza with Customizations being the toppings. Hence the ERP prepared would be a Perfect fit for only your Company."***

## How Quick ERP improves the Business Efficiency

---

## OUR MODULES

The Seamless Coordination in our ERP enables real-time data sharing among modules like finance, inventory, and HR, enhancing collaboration and decision-making. This helps in optimizing overall efficiency and accuracy in organizational processes.

## **KEY FEATURES:**

**1. Multi-Country** – Can work in different time zones

**2. Multi-Currency** – Can work in multiple currencies with dynamic exchange rates

**3. User Based Access setting** – All modules and sub modules can be made accessible and inaccessible by the click of a single button given in the ERP

**4. Multiple Company Branch / Locations**

**5. Customization at User level** - using general settings, many fields, thresholds can be set by top level authorities

## **BENEFITS:**

1. Integration across departments gives a Holistic Business View.
2. Streamlined processes leads to a significant boost in the efficiency.
3. Automation of routine tasks frees up resources, enhancing productivity.
4. Efficient resource allocation leads to reduced operational costs and enables cost savings.
5. Real time data can be used to lay a strategic plan for the company's future.
6. Can be easily scaled as per growing business and increasing needs.
7. Data archiving, security and maintaining sensitive information can be achieved with ease.

## CRM AND SALES MANAGEMENT

Quick ERP – CRM software allows an organization to effectively manage the entire lifecycle of the customer relationship. It helps in managing the interaction with potential as well as existing customers. From lead generation till Quotation generation with follow-up, to Order Confirmation, Invoice Generation and Payment Collection, all of this can be effectively managed using our CRM.

### Modules in CRM and Sales Management:

#### CRM

- Dashboard and Classification - Lead Management
- Classic Quotation Document Generation
- Follow Up Management
- Automated Calling List for Employees
- Customer Support Tracking

#### Sales Management

- Customer Creation and Management
- Order Management (to Production)
- Sales Invoice Generation (Classic Print)
- Accounts Receivable Entry and follow up

**\*All modules have approval checkpoints as per hierarchy**

## **PROCUREMENT AND PURCHASE**

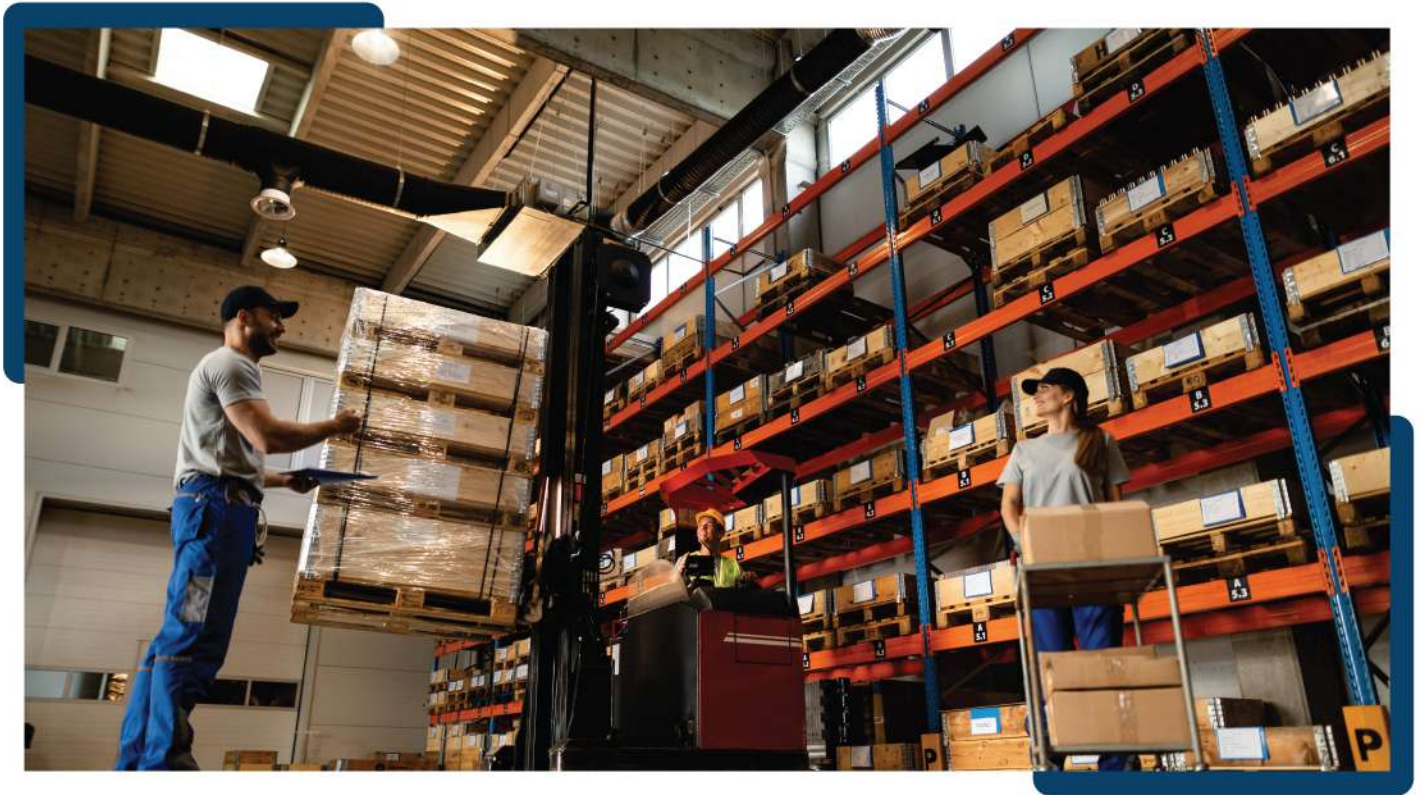

Quick ERP Purchasing module streamlines procurement of required raw materials. It will automate the processes of identifying potential suppliers, negotiating price, giving purchase order to the supplier, and billing processes. Purchase module is tightly integrated with the inventory control and production planning modules. Purchasing module is often integrated with supplychain management software.

### **Modules in Procurement and Purchase:**

- Purchase Requisition Generation
- Vendor Quotation Comparison
- Purchase Order Generation (Classic Print)
- Purchase Order and Supplier Management
- Purchase Bill Generation
- Accounts Payable Entry and Management

**\*All modules can have approval checkpoints as per hierarchy**

## **PRODUCTION AND INVENTORY MANAGEMENT**

An ERP inventory management system provides the entire organization with real-time inventory information. This is a critical capability for businesses that intend to expand, have complex workflows or supply chains, require advanced automation, operate in "just in time" mode, sell a large number of products, or simply want to maximize their inventory investments.

- Material Creation
- Rack Management
- Inward, Outward Management
- Inventory Tracking
- Material Requirement Planning
- Barcode Scanning

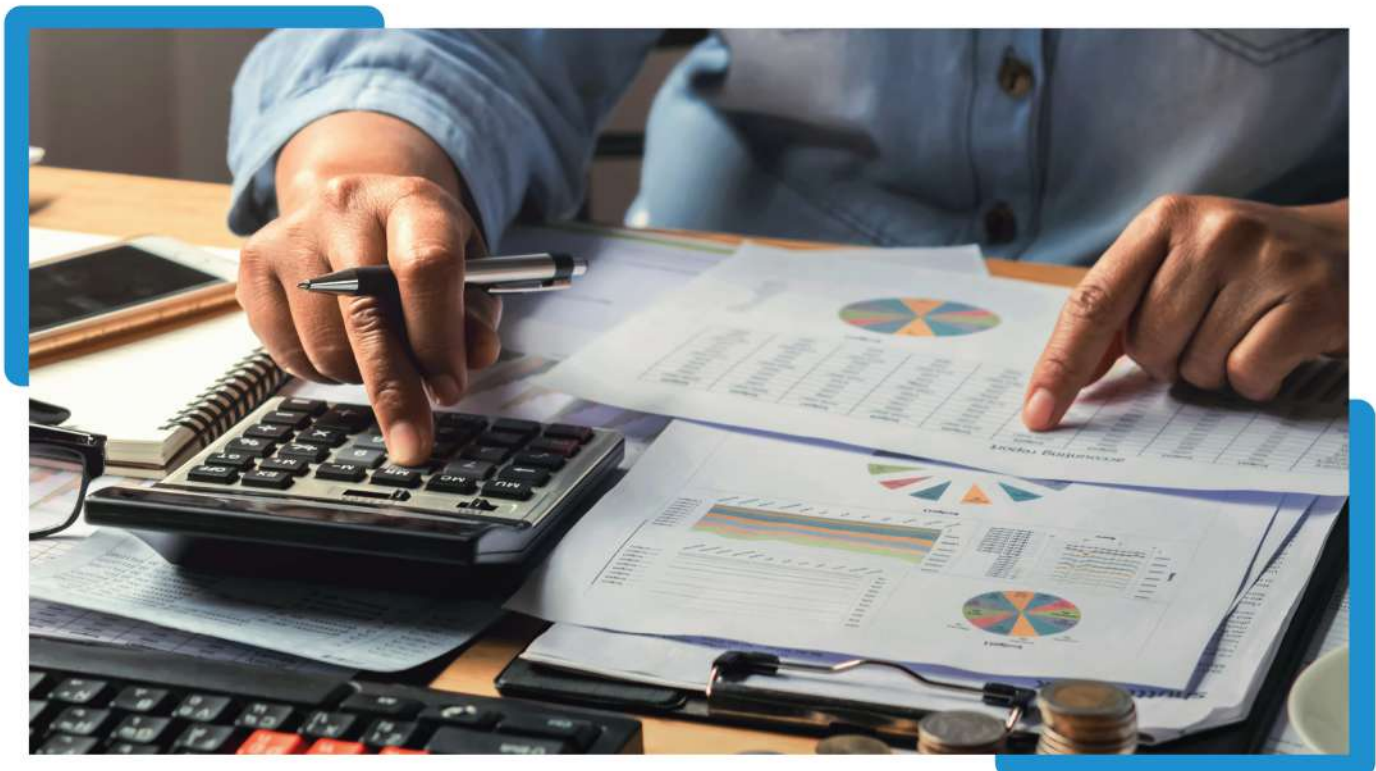

## **ACCOUNTING AND FINANCE**

Quick ERP facilitates simple management of accounts and related activities. Quick ERP also ensures accurate calculation of GST for business owners who want to keep an eye on their invoices, inventory, bank transactions, assets & liabilities, cash inflows / outflows, P & L account, over all reports & keep their finances in organized manner.

Our ERP provides detailed and precise accounting records and documents (i.e. invoices, records, accounts, GST returns, etc.) that conform to regulatory standards and formatting, and submit timely reports to the Tax Authorities.

### **Modules of Finance and Accounts are:**

- Ledger Creation
- Journal Entries
- GST Dr/Cr Note
- Automation of Trial Balance
- Automation of Profit & Loss Statement
- Automation of Balance Sheet
- Bank Reconciliation
- GST Reconciliation
- Bank Statement

## **HR and PAYROLL MANAGEMENT**

Quick ERP's HRMS module is specially designed and performs the below functions of human resource management with more ease and efficiency

- Recruiting and managing employees and attendance
- Tracking leaves and expenses
- Handling onboarding, training and appraisal

### **Modules of HR and Payroll Management are:**

- Employee management
- Automated Attendance
- Leave Application Management
- Allowance Management
- Payroll Management
- Pay-slip generation

## MIS, DASHBORAD, REPORTS

In Quick ERP, Management Information System (MIS), Dashboards, and Reports play crucial roles in providing valuable insights. The top management and the stakeholders can have a bird's eye view of the activities going on in the company.

These Dashboards also serve as the place of visibility for approvals put at various levels and in various processes.

The reports help in summarizing data over a period of time and can gives useful inferences for making sound decisions.
